MANAGEMENT REPORT · WHOLE PERIOD

1 Jan 2024 – 30 Jun 2026

30.0 months, of which 13.4 in Asia · based on the annual reports 2024–2026 · made on 10 Nov 2026 from ledger_transfer_examples.xlsx (sample data)

Income	Spending	Left over	Net worth at the end
€32,229	€22,534	€9,695	€18,277
€1,076 per month · 94% salary	€752 per month · from €869 to €580 · Asia €10,225	30% of the income · 16% → 36% → 46%	+€9,695 · €15,077 without pension

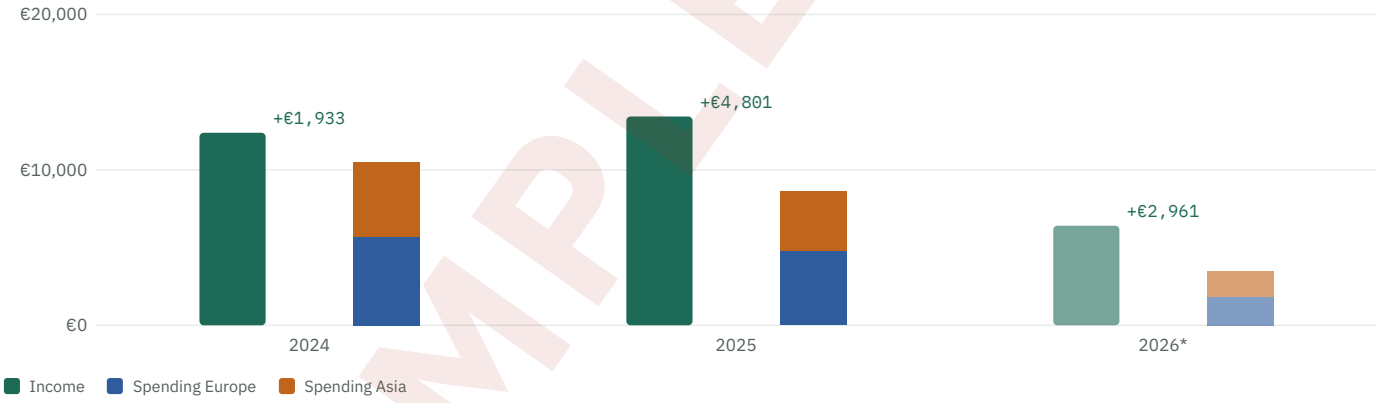

From 1 January 2024 to 30 June 2026, **€32,229** came in and **€22,534** went out. **€9,695** was left over (**30%** of the income), and net worth more than doubled from **€8,583** to **€18,277**. Every period was better than the one before: the savings rate went from **16%** in 2024 to **36%** in 2025 and **46%** in the first half of 2026, and spending per month fell from **€869** to **€580**. The improvement comes from cheaper winters in Asia and lower one-off spending, not from more income: pay per working month stayed at about **€2,200**. 2026 covers only the first half of the year, without flights and with just two working months, so its savings rate will come down.

Key findings

- **A fixed seasonal rhythm.** From May to September there is work and saving in Europe; from November to March or April there is no income and the stay in Asia is paid from savings.
- **The winters get cheaper.** The drop from high to low went from €3,840 (2024/25) to €2,978 (2025/26). Asia cost €976 per month in Asia in 2024, €778 in 2025 and €454 in early 2026.
- **Spending fell, income did not rise.** Total spending fell by €1,817 from 2024 to 2025, mostly Asia daily (−€969), electronics (−€465) and groceries (−€268). Pay per working month stayed at €2,180–2,250.
- **Fixed costs are the one group that keeps rising.** €1,241 → €1,389 → €760 in half a year (€1,520 a year). The storage unit alone is €1,308, 39% of all fixed costs.
- **Saving goes mostly to free net worth.** Of the €9,695 left over, €2,700 went to the pension and €6,995 stayed available.

Year by year

Income next to spending (Europe and Asia stacked). The number above each year is what was left over. * 1 Jan – 30 Jun 2026.

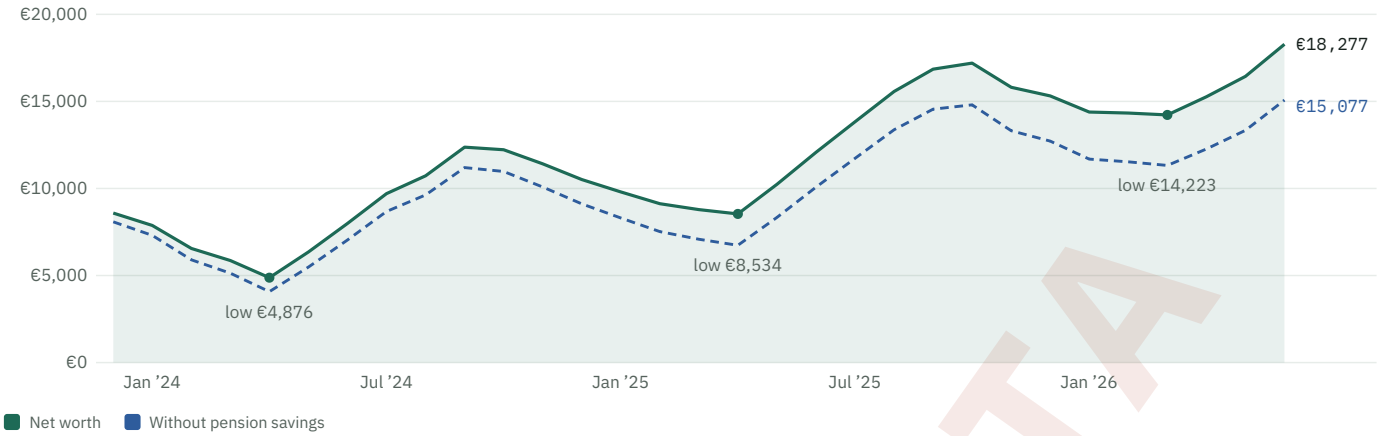

Year	Income	Spending	Of which Asia	Left over	Savings rate	Spending per month	Months in Asia	Net worth at the end	Without pension
2024	€12,385	€10,452	€4,780	+€1,933	16%	€869	4.9	€10,516	€9,116
2025	€13,436	€8,635	€3,811	+€4,801	36%	€720	4.9	€15,316	€12,716
2026*	€6,407	€3,446	€1,634	+€2,961	46%	€580	3.6	€18,277	€15,077
Whole period	**€32,229**	**€22,534**	**€10,225**	**+€9,695**	**30%**	**€752**	**13.4**	**€18,277**	**€15,077**

SAMPLE DATA

Net worth: up in every working season

All sources together at the end of every month; the dashed line leaves out the pension savings. Every dip is a winter in Asia without income; the dots mark the lowest point of each winter.

Trend 1 · The winters get cheaper

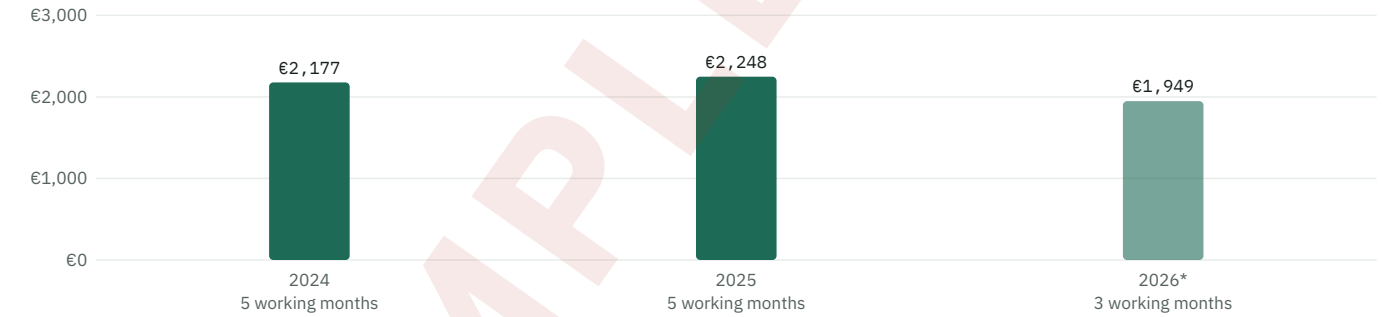

From the highest point before the winter to the lowest point after it. The first winter starts at 1 Jan 2024, the start of the data.

Winter	High	Low	Drop	Low falls in
2023/24	€8,583 (start, 1 Jan 2024)	€4,876 (Apr 2024)	−€3,707	April
2024/25	€12,374 (Sep 2024)	€8,534 (Apr 2025)	−€3,840	April
2025/26	€17,201 (Oct 2025)	€14,223 (Mar 2026)	−€2,978	March

Each winter low is higher than the one before: **€4,876**, **€8,534**, **€14,223**. A working season adds €7,500–8,700 and a winter takes €3,000–3,800 back; in 2025 that left €4,801.

Trend 2 · Same pay, fewer expensive months

Average income in the months with more than €1,000 income. The yearly income depends on the number of working months.

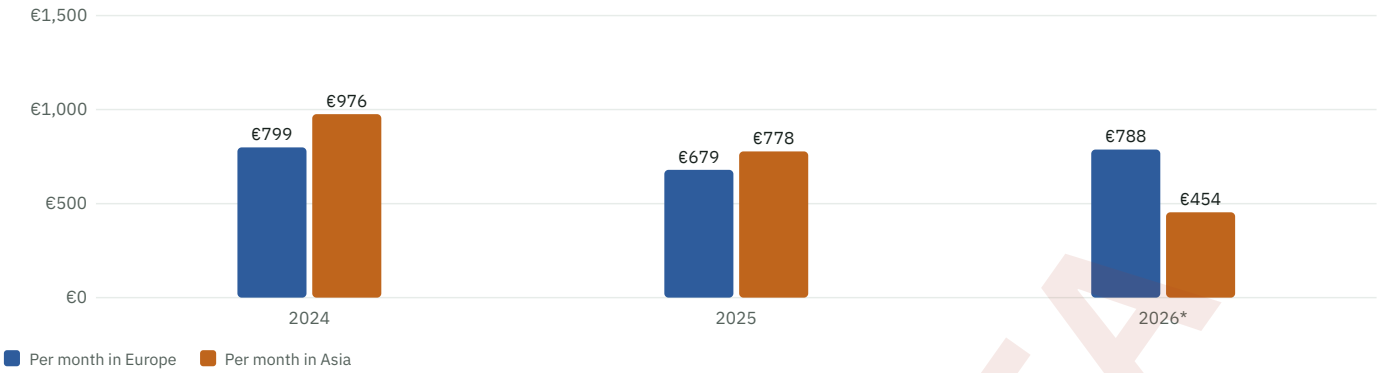

Break-even. With **€8,635** spending in 2025 and about **€2,250** per working month, about **4 working months** break even. Every month on top adds about **€1,500** (pay minus the cost of a month in Europe). 2025 had 5 full working months plus two part months (April and October) and saved **€4,801**.

SAMPLE DATA

Trend 3 · Asia got cheaper, Europe stayed level

Spending in Europe divided by the months in Europe, and spending in Asia divided by the months in Asia, following the Europe/Asia split in the annual reports. 2026* is the first half year only.

	2024	2025	2026*	Change 2024 → 2025
Asia daily	€3,637	€2,668	€1,390	−€969
Groceries	€2,329	€2,061	€702	−€268
Miscellaneous (of which electronics)	€904 (€849)	€532 (€384)	€160	−€372
Flights	€853	€767	€0	−€86
Eating out & coffee	€512	€363	€98	−€149
Fixed costs	€1,241	€1,389	€760	+€148
Total spending	€10,452	€8,635	€3,446	−€1,817

Fixed costs

The fixed-cost categories per year, from the fifteen largest categories in the annual reports; the rest is "other small items". — = not in that list.

Fixed costs	2024	2025	2026*	Whole period
Total	€1,241	€1,389	€760	€3,390
storage_unit	€510	€540	€258	€1,308
ai_tools	€200	€261	€131	€592
health_insurance	€189	€224	€126	€539
phone_internet	€162	€180	€90	€432
hosting	—	—	€96	—
Other small items	€180	€184	€59	€519

Fixed costs rose from **€103** per month in 2024 to **€116** in 2025 and **€129** in the first half of 2026. Each of the four main items rose a little; hosting is new in 2026.

Saving: mostly free, partly pension

What was left over per year, split over the pension savings (BANK_PENSION) and free net worth.

Year	Left over (income − spending)	To pension (BANK_PENSION)	Added to free net worth	Pension at year end
2024	+€1,933	+€900	+€1,033	€1,400
2025	+€4,801	+€1,200	+€3,600	€2,600
2026*	+€2,961	+€600	+€2,361	€3,200
Whole period	**+€9,695**	**+€2,700**	**+€6,995**	

The pension contribution is modest and steady (about €100 a month in 2025). Unlike in many real ledgers, most of the savings stay freely available: **€6,995** of **€9,695**.

Exceptions

When	What	Note
Feb 2024	Expensive Asia month (€1,328)	Asia €1,246; only November 2025 (€1,258) had more Asia spending.
Apr 2024	Most expensive month (€1,509)	Europe €1,366 in the month of the return from Asia, while income was only €523 (a tax refund).
Aug 2024	€642 Asia spending in a working month	Probably the next winter's flight or housing paid in advance.
2024	Electronics €849	One single purchase; it makes Miscellaneous in 2024 the highest of the three years.
Oct 2024	Deficit in a working month (−€147)	Last, partial pay (€865) and €874 spending in Europe.
Nov 2025	Expensive start of the winter (€1,390)	Asia €1,258 in the first month of the stay.
Jan–Feb 2026	Net worth −€500, then +€500	Moves that income and spending do not explain; see Data quality.
2026	accommodation_unused €220	Accommodation paid for but not used.
2026*	No flights booked yet	The first half of 2026 has no flights; the return flight will land in the second half.

SAMPLE DATA

Data quality

Normally: net worth at the end of last month + what was left over = net worth at the end of this month. Only January and February 2026 break that rule.

Point	What the figures show	To do
Jan–Feb 2026	Net worth falls €500 more than the deficit in January and rises €500 more than the result in February.	Book the transfer between own accounts in one month.
Half year 2026	2026 covers 1 Jan – 30 Jun only: mostly cheap Asia months and two working months, no flights.	Do not compare the 2026 savings rate with full years.
CREDIT_CARD	Ends at −€49.	Check that the card payment has been booked.
CASH_USD	Goes from €51 to €0.	Check whether the dollars were spent or exchanged.
Tax refunds	€1,402 as a separate income group.	Fine as it is; keep it apart from salary for comparison.

Recommendations

1. **Keep the winter budget of 2025/26:** a drop of at most €3,000 per winter and €500–800 per month in Asia.
2. **Review the fixed costs:** the storage unit (€540 a year) is the largest fixed item; with ai_tools (€261) and the new hosting (€96) the subscriptions together pass €350 a year.
3. **Plan for the second half of 2026:** flights (€770–850 in earlier years) and the October–December months without full pay will lower the 46% savings rate; a full-year rate of 30–35% is realistic.
4. **Plan enough working months:** with €8,600 spending a year and about €2,250 per working month, 4 working months break even; every extra month adds about €1,500.
5. **Fix the bookkeeping:** the €500 moved between January and February 2026, CREDIT_CARD (−€49) and CASH_USD.

Source: the annual reports 2024–2026 with overview from the Ledger dashboard (ledger_transfer_examples.xlsx, sample data). Income = rows of type IN; spending = OUT rows, paper gains and losses and uncategorised rows, minus refunds. TRANSFER rows and opening balances do not count. Net worth includes the pension savings; a month is 30.4 days; a working month is a month with more than €1,000 income. Not financial advice.

SAMPLE DATA

REPORT · WHOLE PERIOD

1 Jan 2024 – 30 Jun 2026

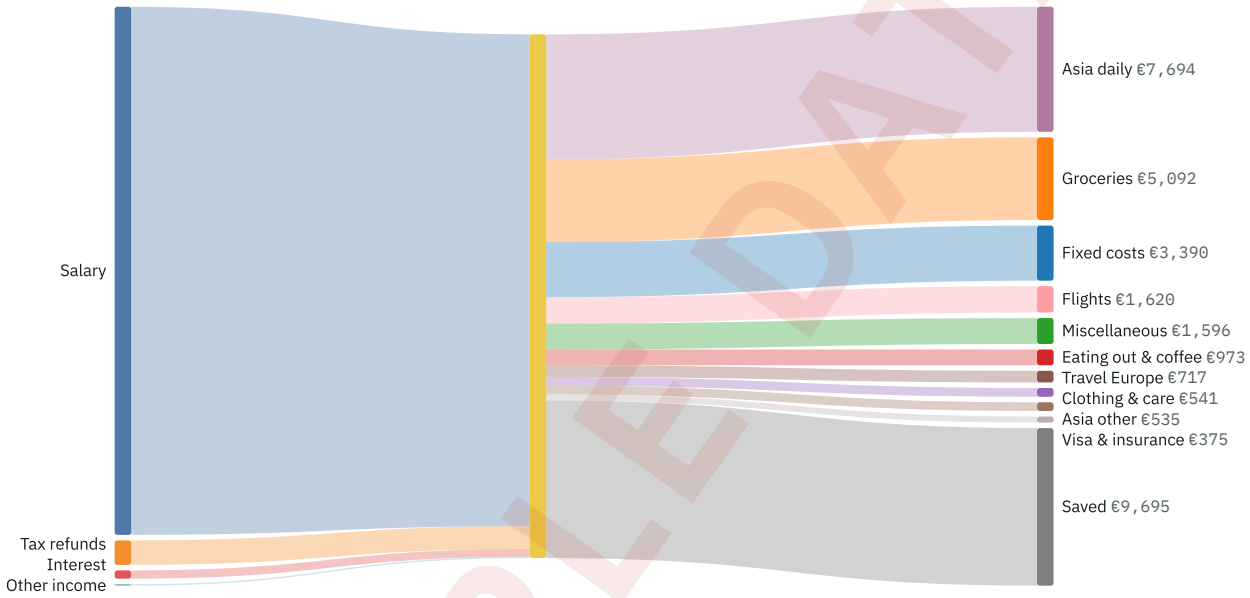

1 Jan 2024 to 30 Jun 2026 · 30.0 months, of which 13.4 in Asia · 2,644 rows · made on 10 Nov 2026 from ledger_transfer_examples.xlsx

Income	Spending	Left over	Net worth at the end
€32,229	€22,534	€9,695	€18,277
€1,076 per month	€752 per month · Asia €10,225	30% of the income	+€9,695 since 1 Jan 2024 · €15,077 without pension

From 1 Jan 2024 to 30 Jun 2026, **€32,229** came in and **€22,534** went out, so **€9,695** was left over (**30%** of the income). Net worth went from **€8,583** to **€18,277** (+€9,695); without the pension savings from **€8,083** to **€15,077**. The largest spending group was **Asia daily**: **€7,694**, 34% of all spending. On average **€752** went out per month, and 13.4 of the 30.0 months were spent in Asia.

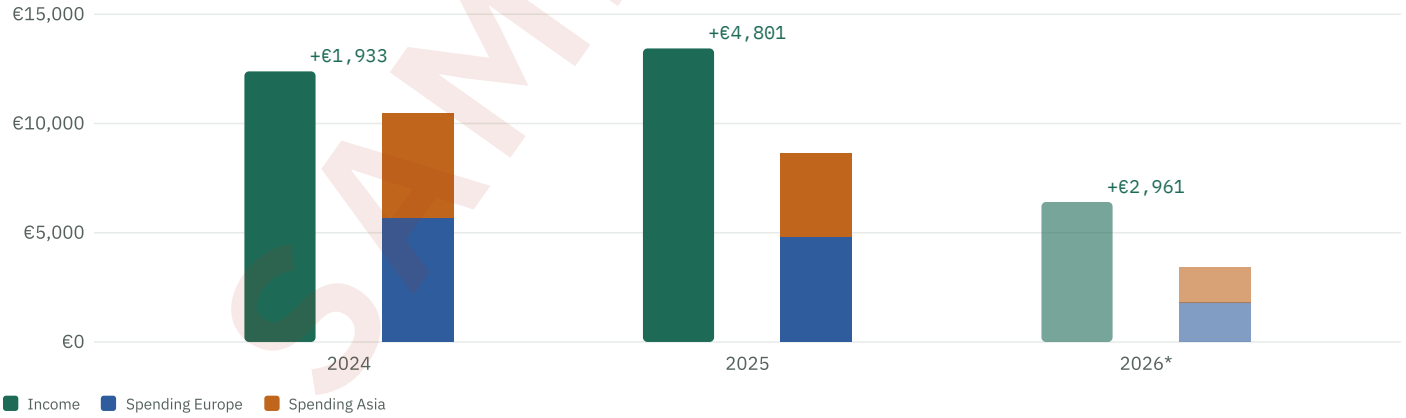

Where every euro went

Income on the left, split over the spending groups and what was left on the right. When more went out than came in, the difference comes from savings. A group where more came back than went out shows up on the left as a refund.

Year by year

ANNUAL REPORT

2024

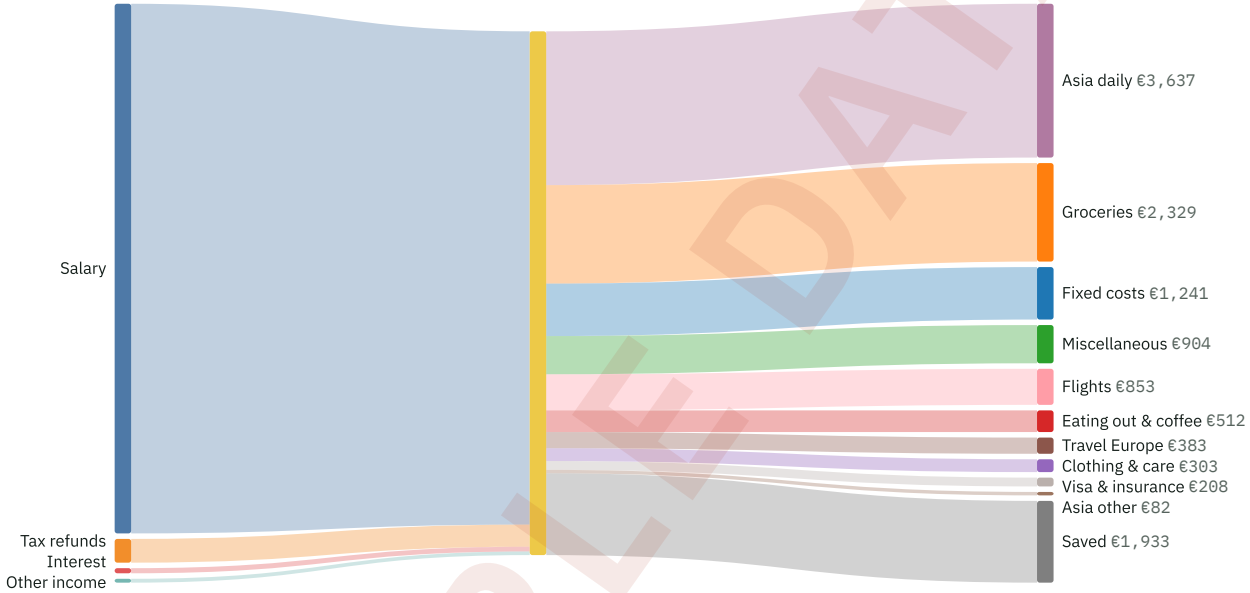

1 Jan 2024 to 31 Dec 2024 · 12.0 months, of which 4.9 in Asia · 1,121 rows · made on 10 Nov 2026 from ledger_transfer_examples.xlsx

Income	Spending	Left over	Net worth at the end
€12,385	€10,452	€1,933	€10,516
€1,030 per month	€869 per month · Asia €4,780	16% of the income	+€1,933 since 1 Jan 2024 · €9,116 without pension

In 2024, **€12,385** came in and **€10,452** went out, so **€1,933** was left over (**16%** of the income). Net worth went from **€8,583** to **€10,516** (+€1,933); without the pension savings from **€8,083** to **€9,116**. The largest spending group was **Asia daily**: **€3,637**, 35% of all spending. On average **€869** went out per month, and 4.9 of the 12.0 months were spent in Asia.

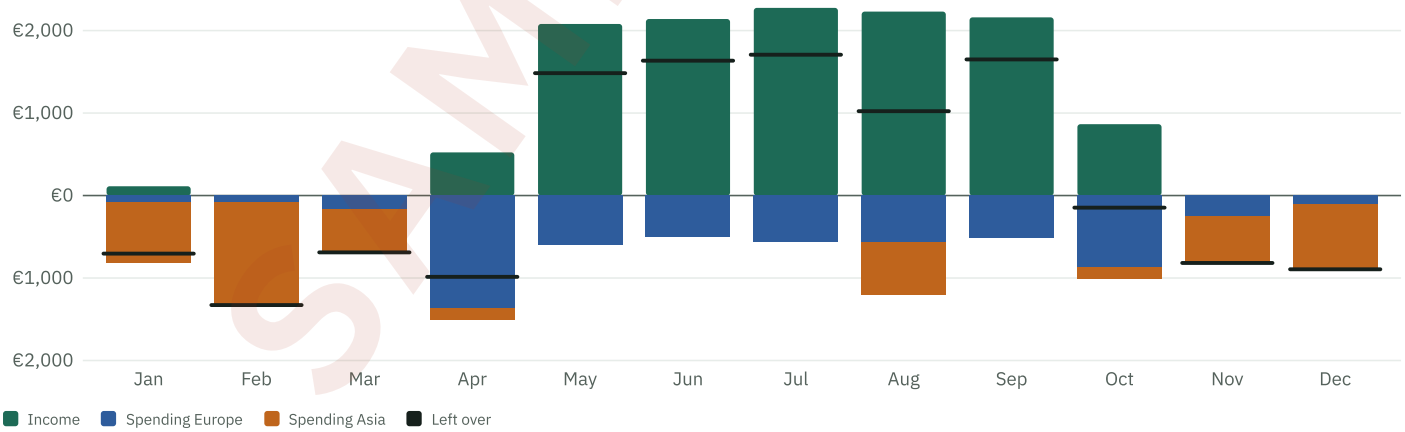

Where every euro went

Income on the left, split over the spending groups and what was left on the right. When more went out than came in, the difference comes from savings. A group where more came back than went out shows up on the left as a refund.

Income and spending per month

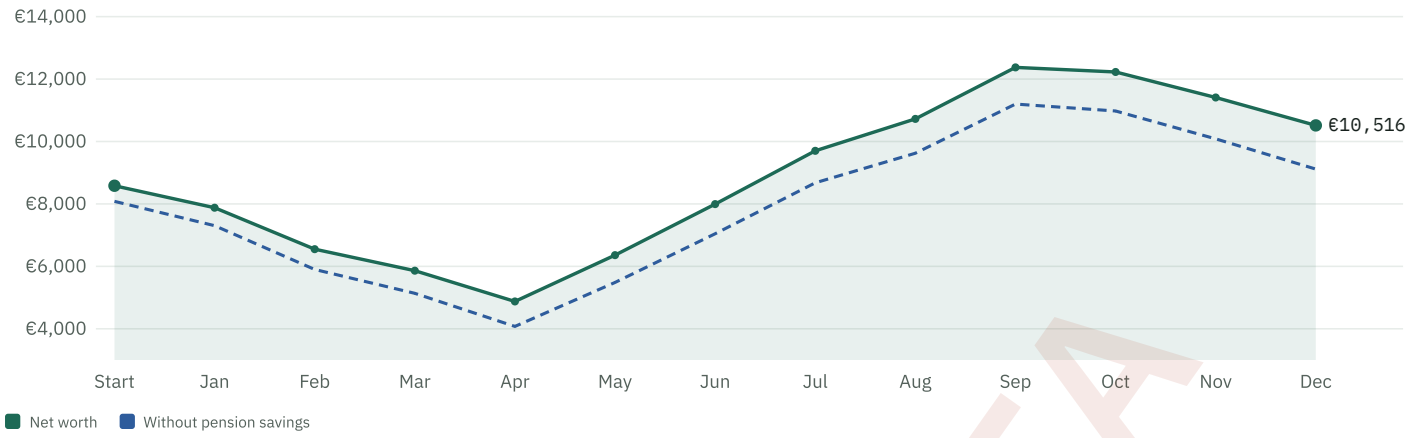

Above the line what came in, below it what went out. The dark stripe is what was left over that month.

SAMPLE DATA

Net worth

All sources together at the start and at the end of every month; the dashed line leaves out the pension savings.

ANNUAL REPORT

2026 · part of the year

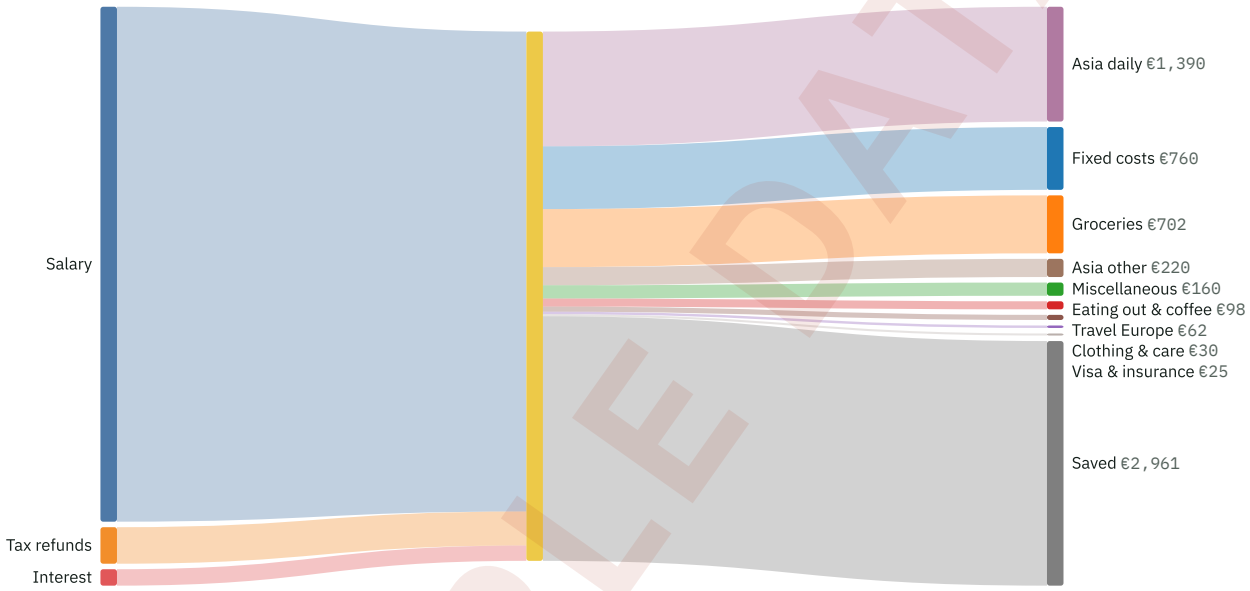

1 Jan 2026 to 30 Jun 2026 · 5.9 months, of which 3.6 in Asia · 521 rows · made on 10 Nov 2026 from ledger_transfer_examples.xlsx

Income	Spending	Left over	Net worth at the end
€6,407	€3,446	€2,961	€18,277
€1,077 per month · −4% vs 2025 per month	€580 per month · Asia €1,634 · −20% vs 2025 per month	46% of the income · 2025: 36%	+€2,961 since 1 Jan 2026 · €15,077 without pension

From 1 Jan 2026 to 30 Jun 2026, **€6,407** came in and **€3,446** went out, so **€2,961** was left over (**46%** of the income). Net worth went from **€15,316** to **€18,277** (+€2,961); without the pension savings from **€12,716** to **€15,077**. The largest spending group was **Asia daily**: **€1,390**, 40% of all spending. On average **€580** went out per month, and 3.6 of the 5.9 months were spent in Asia. Compared with 2025, per month, spending went down by **20%** and income went down by **4%**.

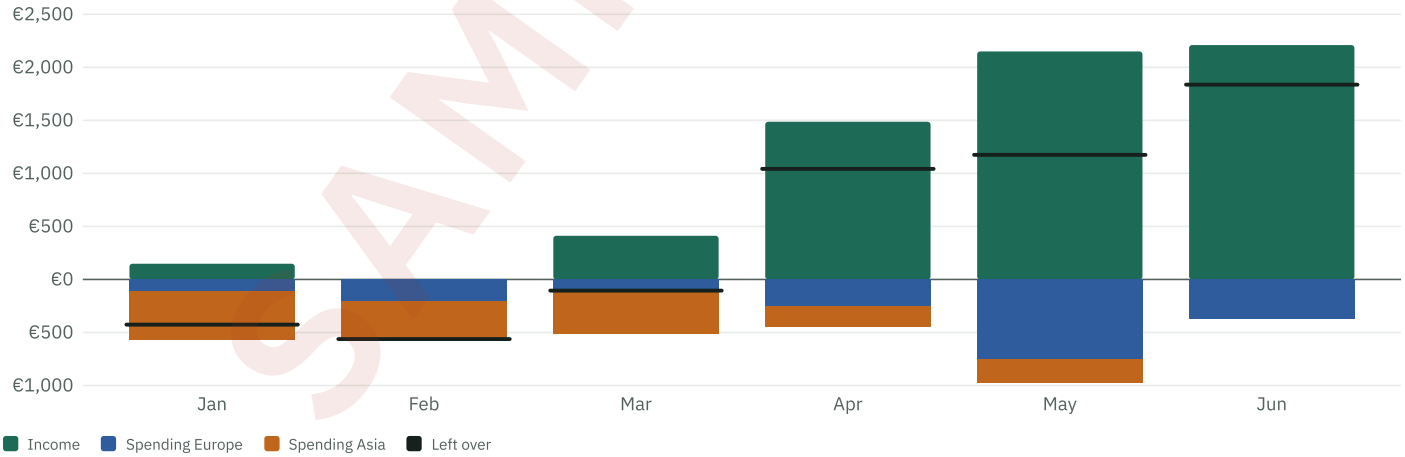

Where every euro went

Income on the left, split over the spending groups and what was left on the right. When more went out than came in, the difference comes from savings. A group where more came back than went out shows up on the left as a refund.

Income and spending per month

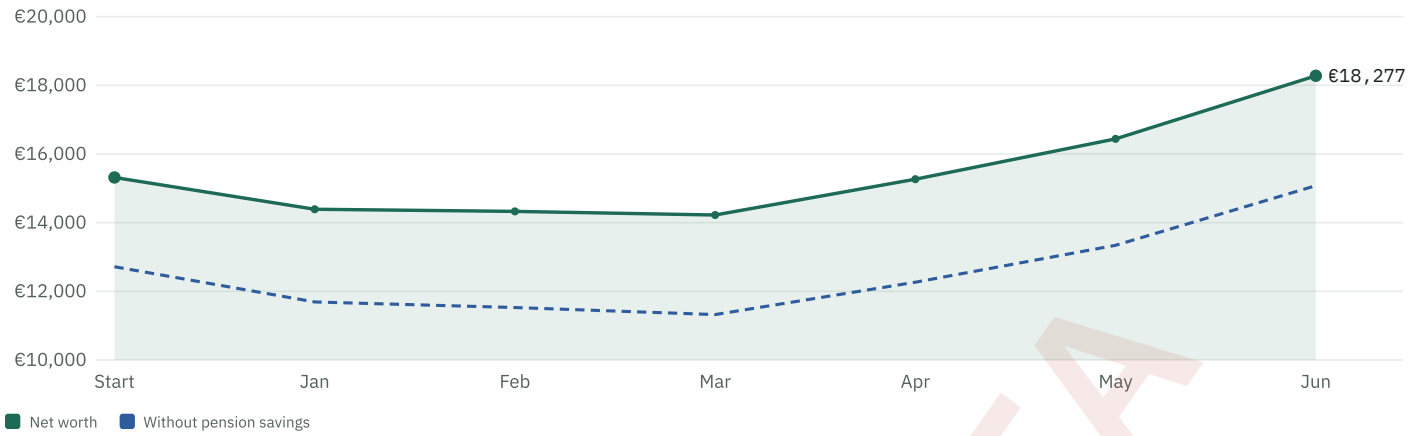

Above the line what came in, below it what went out. The dark stripe is what was left over that month.

SAMPLE DATA

Net worth

All sources together at the start and at the end of every month; the dashed line leaves out the pension savings.

Per group, per month

Per month is the total divided by 5.9 months (30.4 days each).

	Jan	Feb	Mar	Apr	May	Jun	Total	Per month
INCOME								
Salary				€1,450	€2,150	€2,210	**€5,810**	€977

Without pension savings	**€12,716**	**€15,077**	**+€2,361**

Income is every row of type IN. Spending is every row of an OUT type, paper gains and losses, and rows still to categorise; refunds lower the spending of their group. TRANSFER rows and opening balances are neither income nor spending. Net worth is the sum of all sources in euros as booked, the pension savings included. A month is 30.4 days.
